What is AI?
AI is about making machines intelligent
AI is about making machines do things that in humans requires intelligence
“AI is about making machines do things that in humans requires intelligence and, in doing so, we learn more about what it means to be human”

Dr. Chris McKillop
AI helps us understand our humanity.

How can AI help us humans?
Step by Step, AI Is Accelerating the Search for a Cancer Cure

AI already is delivering breakthroughs in cancer diagnosis, but even optimists believe a cure is a decade away.
Make the world a better place through AI.
General Market Media Buyer
Job listing for a Marketing role in San Francisco
By Clay Satterfield and Jensen Harris

Our agency needs a killer media buyer. Fun, fast paced... blah blah. Look, no kidding here. We tend to work hard and we hope you will too. We're smart and passionate; you will need to be as well. We're rapidly expanding and need an experienced media buyer and a visionary leader. While we're focused on television, experience in other mediums is a huge plus. You understand when you need to book and when to go the general market route.

Do you have a great sense of humor? Do you want to work somewhere your unique voice will be heard? Are you driven by the ability to set and exceed ambitious goals? When you see something that's a problem, do you make a change or just complain?

A couple of things that you must do in this role:

- Work with vendors to nurture exciting partnerships for our clients
- **Teach** everyone in the company something new in technology
- Work collaboratively with clients
- **Improve ROI** by working within the client results workbooks
- Know the numbers cold. Every time.
Hi, I’m afraid I can’t make that time

Perhaps we could meet them an hour later?

Chris

Would you like to know more about chatbots for empathy training in your workplace?

Yes, tell me more 😊

Chatbots can help you train your employees’ empathy skills in instant messaging apps.

Why is empathy so important at work?

We spend a quarter of our day communicating online, so great empathy skills help us avoid misunderstandings that result in lost productivity, stress, poor customer experience.

How does it work?

Training is done in real-time, using gamified activities 🏆 to learn empathy skills in realistic scenarios.

Sounds awesome - how do I sign up?

Contact Turalt to find out more. Details are below.

Is a crime scene gang-related? A new computer program may have the answer. ISTOCK.COM/DENISTANGNEYJR

Artificial intelligence could identify gang crimes—and ignite an ethical firestorm

By Matthew Hutson | Feb. 28, 2018, 8:00 AM

When someone roughs up a pedestrian, robs a store, or kills in cold blood, police want to know whether the perpetrator was a gang member: Do they need to send in a special enforcement team? Should they expect a crime in retaliation? Now, a new algorithm is trying to automate the process of identifying gang crimes. But some scientists warn that far from reducing gang violence, the program could do the opposite by eroding trust in communities, or it could brand innocent people as gang members.

Why Uber’s self-driving car killed a pedestrian

It was the first fatal accident of its kind

Ethics

THEY are one of the most talked-about topics in technology—but lately they have been for all the wrong reasons. A series of accidents involving self-driving cars has raised questions about the safety of these futuristic new vehicles, which are being tested on public roads in several American states. In March 2018 an experimental Uber vehicle, operating in
TESLA'S AUTOPILOT WAS INVOLVED IN ANOTHER DEADLY CAR CRASH

‘Autopilot’

TESLA NOW HAS another fatality to hang on its semi-autonomous driving system. The company just revealed that its Autopilot feature was turned on when a Model X SUV
What AI do we want?
AI helps us understand our humanity.
